The Secret to getting an instant Pay Raise on your Job

You are probably missing out on money every week, or every 2 weeks in your paycheck and you don't even know it.

It's not your fault though.

It's just that no one ever pointed it out to you or gave you the proper education on how get that extra money that always belonged to you.

No one ever explained to you that by just implementing some simple Financial strategies, your financial situation can change instantly.

Yes, I said instantly.

Now I know when I mentioned "financial strategies" you probably started to yawn.....LOL! (Trust me I yawned too!**)**

Don't worry, this happens to most people because most people believe that learning financial strategies are "over their head" and really very BORING... but it's really not.

In this one little ebook you are reading you are going to learn at least "1" strategy that is going to add "money" to your paycheck by your next pay period.

Now I bet that woke you up a little bit.....and right about now skepticism is starting to set in....and that's ok too. I love when people are skeptical about this information because this gives me the opportunity to teach you something that you didn't know.....that you didn't know.

I hope you caught that.

Before I reveal this simple little strategy, First let's talk about the plight of the normal "Working Joe" that is constantly struggling in this "so-called" economy.

America is the wealthiest country in the world.

Ok Big Deal, you already knew that right?..... But let me expand on that a little for you.

Statistics show America accounts for more than 25% of the world's wealth, is home to

- 536 Billionaires**
- and nearly 7,000,000 Millionaires.**

However, even with all this wealth, 80% of Americans feel like they are falling behind financially.

Do you fall within that 80%?.....ok just checking.

Even the Social Security Administration reported that for every 100 people born in America, by the time their 65th birthday arrives,

- 36 are dead,**
- 54 are financially dependent on family or welfare,**
- 5 are still working,**
- 4 are financially successful**
- and 1 is wealthy.**

Sounds like someone you know maybe?.....

Corporate wages are stagnant, most companies have dumped their pensions and economic growth is slow.

The bottom line is, for most people, old financial strategies are not working. Millions of people are looking for alternative ways to improve their finances.

Most people need more Cashflow and Better Financial Strategies.

You know what?...let me Rephrase that.

EVERYONE needs more CashFlow and Better Financial Strategies.

Stay with me now!.....

Well.....how can a normal “working Joe” like me get more cashflow?..... I’m sure you’re asking yourself. Its very simple and you can begin by working on your very own paycheck.

Imagine getting an extra \$100 to \$300 a month added to your check just by implementing a simple little strategy that you didn’t know about.

...And yes its Very Legal and supported 100% by the government!

Don’t worry I will reveal this shortly. I just need to school you just a little bit more on a couple of things.

A Struggling Mindset

Do you have a struggling mindset? If you are working a 9-5 job and you are working from Paycheck to Paycheck..... then yes you do have a struggling mindset.

And please don’t be offended because most of us do. That was on Purpose.

You see with Capitalism you are either the “Employee” or the “Employer”

The “Employer” has a completely different mindset than the “Employee”

The both need each other, except the needs are different.

The “Employee” needs an environment where he or she can receive money to do the job expected of them, so that they can continue to pay their bills and sustain their current lifestyle. The “Employer” provides that for them.

The “Employer” needs to pay a person “Just Enough” to provide their Talent or Skill to help their company continue to make a profit. The “Employee” provides that all day.

The Employer never struggles and is Favored by the Government in regards to taxes.

The Employee Always struggles and is NOT Favored by the Government in regards to taxes.

So as an “employee” your goal should be working towards becoming an “employer”..... Plain and Simple.

You should be an “Employer” even if you are just employing yourself.

Here’s the reasons why:

- **First of all, as an EMPLOYER you pay less taxes if you have your own business. As a matter of fact you can have your own business and Make NO MONEY and still pay less taxes than an employee.**
- **Second of all, there’s NO LIMIT as to how much money you can make. No one can put a cap on your income except you.**
- **Your business will pay for the things that you are using right now as long as you can show that you are using these items to help facilitate your business...Like (Home office, Cell phn, Vehicle, etc....)**
- **Finally as a business Owner you are now using a formula that the “rich” uses and that formula is “CASH – ASSET – CASH”**

And what that simply means is that you use your CASH to buy ASSETS, that bring you more CASH.

So in essence you learn how to ALLOW your money to work for you rather than you Work for your money.

Your BUSINESS is an ASSET that will Bring you more CASH.

So when an employer is “paying you”, your efforts to keep your job are paying your employer an enormous return which is the only reason why he is paying you.

Once the “return” has been negatively affected in any way, meaning the profit was not what he expected..... “You” get fired.

The Employer never gets hurt..... The employee always gets hurt.

The employee will always lose their job before the Employer’s profit margin is hurt in anyway.

And here’s what really sucks as an employee.....

You will never see it coming

Ok so now what, because starting a business is not easy otherwise you would have done it already. Well the only reason why you haven’t done it is because no one actually gave you a gameplan that actually worked right from where you are now.....as an “Employee”

I help many people start their businesses from a very simple gameplan, and its starts right at the job are working at right now.

And here is the Game Plan:

- **Minimize Taxes**
- **Eliminate Debt**
- **Generate Business Income**
- **Asset Accumulation.....(This is a Big one. I will tell you why later)**

Now I know that sounds extremely Boring and you’re probably starting to yawn right now, but I promise you this will begin to become extremely exciting!.....Trust me I felt the same way, but hear me out!

All 4 of the Bullet points above are what you are going to have to implement to get you on the “SURE” path to wealth....and it will start instantly!

This is NO FLUFF and NO HYPE and will Cost you nothing to begin your financial transformation.

Ok Are you Ready?

Ok Here we Go

Re-Visit your W4

(Employee's Withholding Allowance Certificate)

My W4?..... What's that?

Remember when you first got hired at your job and the Human Resources dept gave you a form to fill out to determine how much taxes to take out of your check?

Can you Remember filling that out?

Well 9 times out of 10 you've probably filled that out incorrectly, and unfortunately allowing the government to hold more of your money every year than they needed to.

As a matter of fact, the IRS stated that at least 80% of all Taxpayers in America are paying more taxes than they need to.

Don't believe me?..... Read the note Below from the Dept of Treasury.

Internal Revenue Service IRS.gov

DEPARTMENT OF THE TREASURY

Big Refund? Big Tax Bill?

Updated April 29, 2005

First, some refund facts:

- Federal tax refunds to individuals totaled more than \$215 billion last year.
- More than 101 million taxpayers got refunds — that's 80 percent.
- The average refund was \$2,126.

Where does your refund come from? It comes from your wallet or purse: when you tell your employer how much to withhold from your paycheck or you make an estimated tax payment **For the average refund, that's about \$40 a week too much.**

You might be using the extra withholding as a "forced savings" method. But Uncle Sam doesn't pay interest on refunds (except in special circumstances). Putting the money in any type of savings account or paying down debts might be a better option.

So let's just say that after you revisit your W4 and fill it out Correctly, you have now increased your paycheck every month by \$200 dollars? Do you spend it on Foolishness?..... NO....You Don't!

You now use that \$200 as a tool to help you get wealthy.

Let me show you what I mean

Remember you didn't miss this \$200 because you didn't know that you had access to it. So now that you do have access to it, you can now begin to let your money work for you and start paying down your debts, to give you access to more of your money.

Let me give you an example.

Let's say that you have a \$1000 Credit card bill, and you were only paying \$50 a month.

And \$15,000 Car loan, paying \$350 a month.

Well now since you now have access to \$200 additional dollars in your check every month, You can now pay down that \$1000 credit card bill in 4 Months because now you can pay \$250 a month on that bill and ELIMINATE that DEBT.

Once that Bill has been Eliminated, you Now have access to \$250 a month in your Arsenal.

Let me say it again..... You now have \$250 a month that you can play with.

\$1000 credit card bill is GONE!

And you now have \$250 Cashflow

Now its time to tackle the \$15,000 Car loan!

You Add the \$250 to the \$350 payment that you are already paying, and now strengthening your car payment to \$600 a month.

At \$350 plus interest a month it would have taken you 5 years to pay that loan off.

But now since you have \$600 a month as your new tool, you will eliminate that car loan in 25 months (2 years).

Now you will have a Positive cashflow of \$600 a month.

And this all started by you just re-visiting you W4

And by the way I can show you how to do that Free of Charge!

Stop Believing the Lie

Today I want you to stop believing the lie that you can never get a head. That is an absolute lie. Everyone can get ahead and live quite comfortably if they just do things a certain way.

Not everyone is born wealthy and that's on purpose by the way. Someone has to work for the wealthy.

But if you're not born wealthy and you would like to begin your road to wealth like I'm doing right now, you just have to operate within certain principles.

You have to apply specific financial strategies that work flawlessly.

You have to be disciplined enough to apply these strategies to pull you completely out of the rat race.

Me and my business partners specialize in the application of these principles.

We specialize in helping the normal "Working Joe" to get out of the rat race and become wealthy.

We do this by sharing 4 Cashflow strategies.

- Minimizing Taxes**
- Eliminating Debt**
- Generating Business Income**
- Asset Accumulation**

Our "Business" is sharing these strategies with people that want a way out of the rat race. The 4 cashflow strategies above are exactly what the "Wealthy" are doing. Exactly.

Here is the secret in a nutshell.

Start a business that allows you to provide a service or product that MOST people need.

Make as much money as you desire, then that will allow you to Pay Less Taxes. Take the money that make and “BUY” more Assets that Make you more money.

Those Assets are:

- **Businesses**
- **Real Estate**
- **Stocks, Bonds, Annuities**

Listen to me close now

These Assets allow your money to WORK FOR YOU!

THAT IS WHAT THE WEALTHY DO

The don't just work hard.....THEY WORK SMART!
